Indoor unit

Power

Note:

- 1.Please refer to the instruction manual to check whether the unit can connect to the engineering electric heating.
- 2.When the unit doesn' t connect to the engineering electric heating, connect the engineering power supply to the L1 and L2 of wiring board.
- 3.When the unit connects to the engineering electric heating, connect the engineering power supply to the breaker.
- 4.The primary input voltage of transformer is defaulted at 208V. When switching the power supply of the complete unit to 230V, connect the primary input voltage of transformer to 240V, which can be realized by exchanging the blue wire and the black wire.
- 5.①Only applicable for iron shell motor.

技术要求:

1. 图案白底黑字，严格按图幅比例，图文正确，画面优美。
2. 用湿布擦15秒，再用浸汽油布擦15秒，图文仍清晰明了。
3. 材料为0.05mm光白PET不干胶。
4. 应符合QJ/GD 41.12.001《不干胶检验规范》的要求。
5. 印刷图尺寸为：外框150×100(长×宽)，内框146×96(长×宽)，内、外框圆角半径分别为R2、R4，公差±1，缩放比例为2:1。
