

To Whom It May Concern:

Within the TOSOT equipment lineup, certain indoor (IDU) and outdoor (ODU) modules not initially sold as a matched pair may be installed together to form a complete system.

The following is a partial list of such equipment:

Indoor Type	Indoor Model	Outdoor Model	Optional Outdoor Model
Mini 4-Way Cassette	TM12HKDI	TW12HQ2A3DO	TW12HQ2C2DO
Console	TM09HEDI	TW09HQ2A3DO	TW09HQ2C2DO
	TM12HEDI	TW12HQ2A3DO	TW12HQ2C2DO
Slim Duct	TM09HFDI	TW09HQ2A3DO	TW09HQ2C2DO
	TM12HFDI	TW12HQ2A3DO	TW12HQ2C2DO
Floor-Ceiling	TM09HTDI	TW09HQ2A3DO	TW09HQ2C2DO
	TM12HTDI	TW12HQ2A3DO	TW12HQ2C2DO

****Please note, these combinations, though factory tested, have not been AHRI certified****

NOTE: In some instances, the Optional Outdoor Model may use different line set connection sizes than the indoor unit. If this is the case, the line set installed should match the size on the INDOOR unit, and adapted at the connection point on the outdoor unit.

Should any of the above *approved* combinations be installed by a licensed and certified installer, TOSOT will provide full factory support and honor factory warranty. Additional combinations *may* also be approved for installation. Check with your local TOSOT representative for details.

Best Regards,
