

TOSOT APEX Heat Kit Fan Interlock

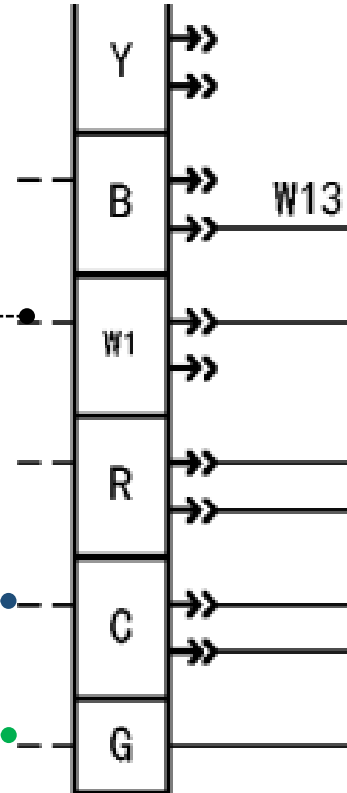

G W1 (AUX)

SPST relay
(NO contact)

Indoor Terminal Strip

Purpose:

A SPST (single pole, single throw) normally open 24VAC relay is used to ensure that the W1 (auxiliary heat) signal is not energized without the G (fan) signal ALSO being energized. This prevents the heat kit from engaging without airflow from the blower.

Notes:

- 1.) This diagram only illustrates the heat kit and fan control wiring. All other wiring as per installation instructions.
- 2.) SPST NO 24VAC relay is to be used W/R 184-912 or equivalent

Outdoor Terminal Strip
